

ABSTRACT

Provided is a method ~~[[for]]~~of making ceramic sphere~~[[. A]]~~a pair of rollers and a core drill with a stopper are employed ~~to perform the method of the present invention.~~ The rotating core drill in cooperation with the rollers machines a cylinder-shaped ceramic core to make a ceramic sphere. The rotating core drill continuously machines the ceramic sphere in cooperation with the rollers to obtain a ceramic real sphere, while the stopper of the core drill prevents the ceramic sphere from moving upward.
